

**DESIRED FOREST
CONDITIONS FOR
WILDLIFE IN MAV**

Application on Private Lands

Denman Co.

Private land ownership in the MAV seems to be dominated by:

Organized Hunting Clubs

Family Ownerships

Both with a primary use for outdoor recreation including wildlife observation.

Private ownerships are ripe for managing for wildlife with DFC concepts and results.

People don't always know of availability of expertise in both fields, forestry and wildlife habitat.

Opportunities for Contacts:

Forest Stewardship Plans

State Forestry Agencies

Technical Services Providers (TSPs)

USDA NRCS

Private Lands Biologists

State Wildlife Agencies

Recruiting others to spread the word:

The Wildlife Society

Often supportive

Southern Hardwood Forestry Group

Reluctantly receptive

Forest Stewards Guild

Ramping up activities in the South

Getting wider application:

American Tree Farm System

State forestry agency often coordinates

Association of Consulting Foresters

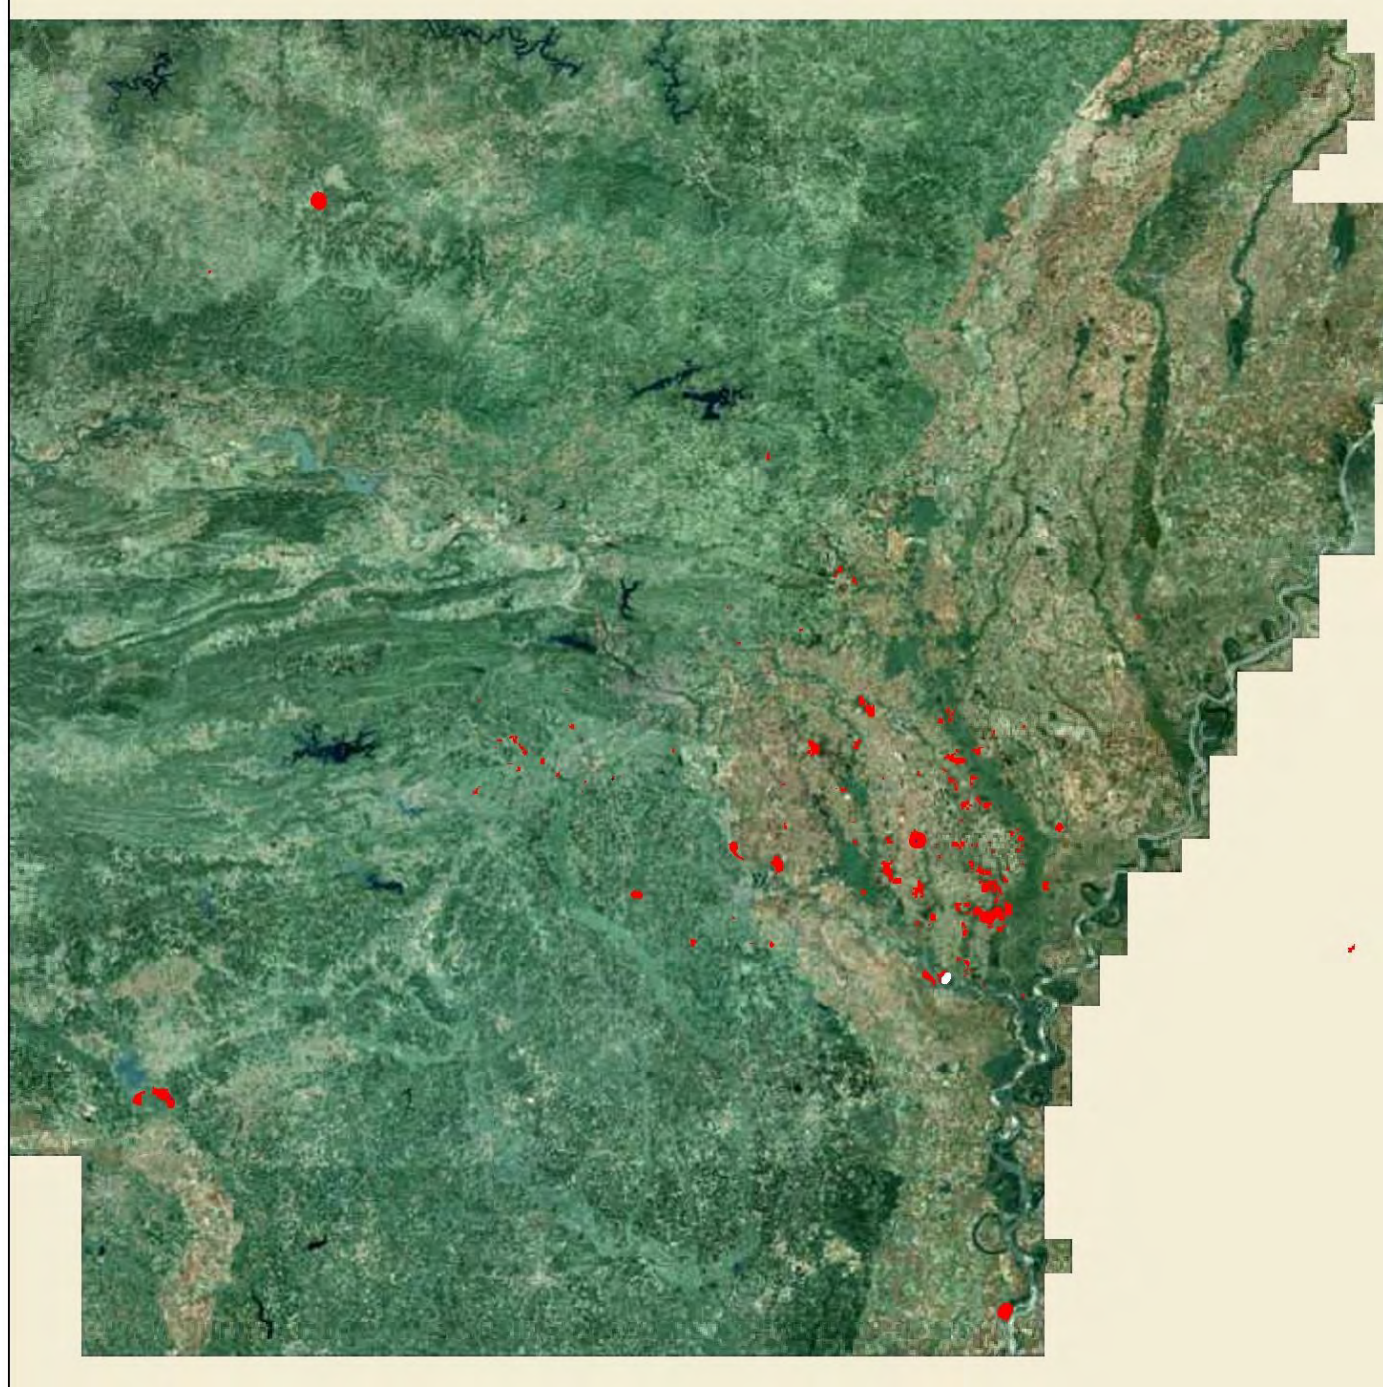

Give them another tool for their toolbox.

Registered Foresters

Continuing Ed, give them the tools.
