Lower Mississippi Valley  
JOINT VENTURE

# Conservation Delivery Networks

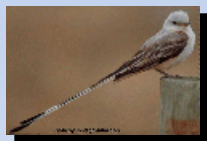

# CDNs – Chartered by the LMVJV

The LMV Joint Venture is a self-directed, non-regulatory conservation partnership that exists for the purpose of implementing the goals and objectives of national and international **LMVJV Form & Purpose** bird conservation plans within the Lower Mississippi Valley region.

## Conservation Initiative

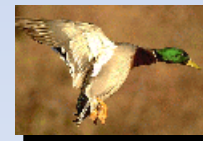

Partners in Flight

U.S. Shorebird Conservation Plan

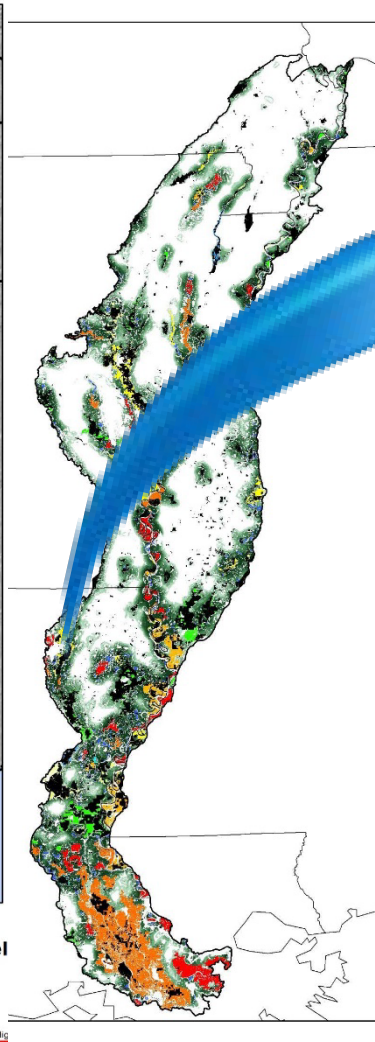

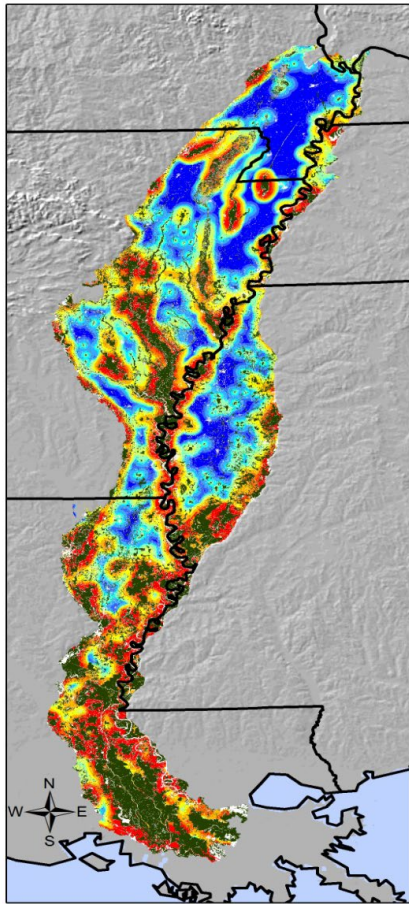

North American Waterbird Plan

North American Waterfowl Management Plan

# Connecting Challenge & People

|                                | Forest | LMJV FBDSM Priority |      |         |    |                 |
|--------------------------------|--------|---------------------|------|---------|----|-----------------|
|                                | Low    | High                |      |         |    |                 |
| Red-tailed Spizelle            | IM     | Increase 100%       | 8827 | 250,000 | 11 | Northern Forest |
| Indigo Bunting                 | IM     | Increase 100%       | 8827 | 78,000  | 13 | Eastern         |
| N. Marsh Sharp-shinned Sparrow | IM     | Increase 100%       | 8827 | 250,000 | 1  | Eastern         |
| Tricolored Blackbird           | IM     | Increase 100%       | 8827 | 250,000 | 1  | Pacific         |

# LMVJV Chartered: Conservation Delivery Networks

**Wildlife Habitat Conservation Through Partnership**

# CDN: Geography & Function

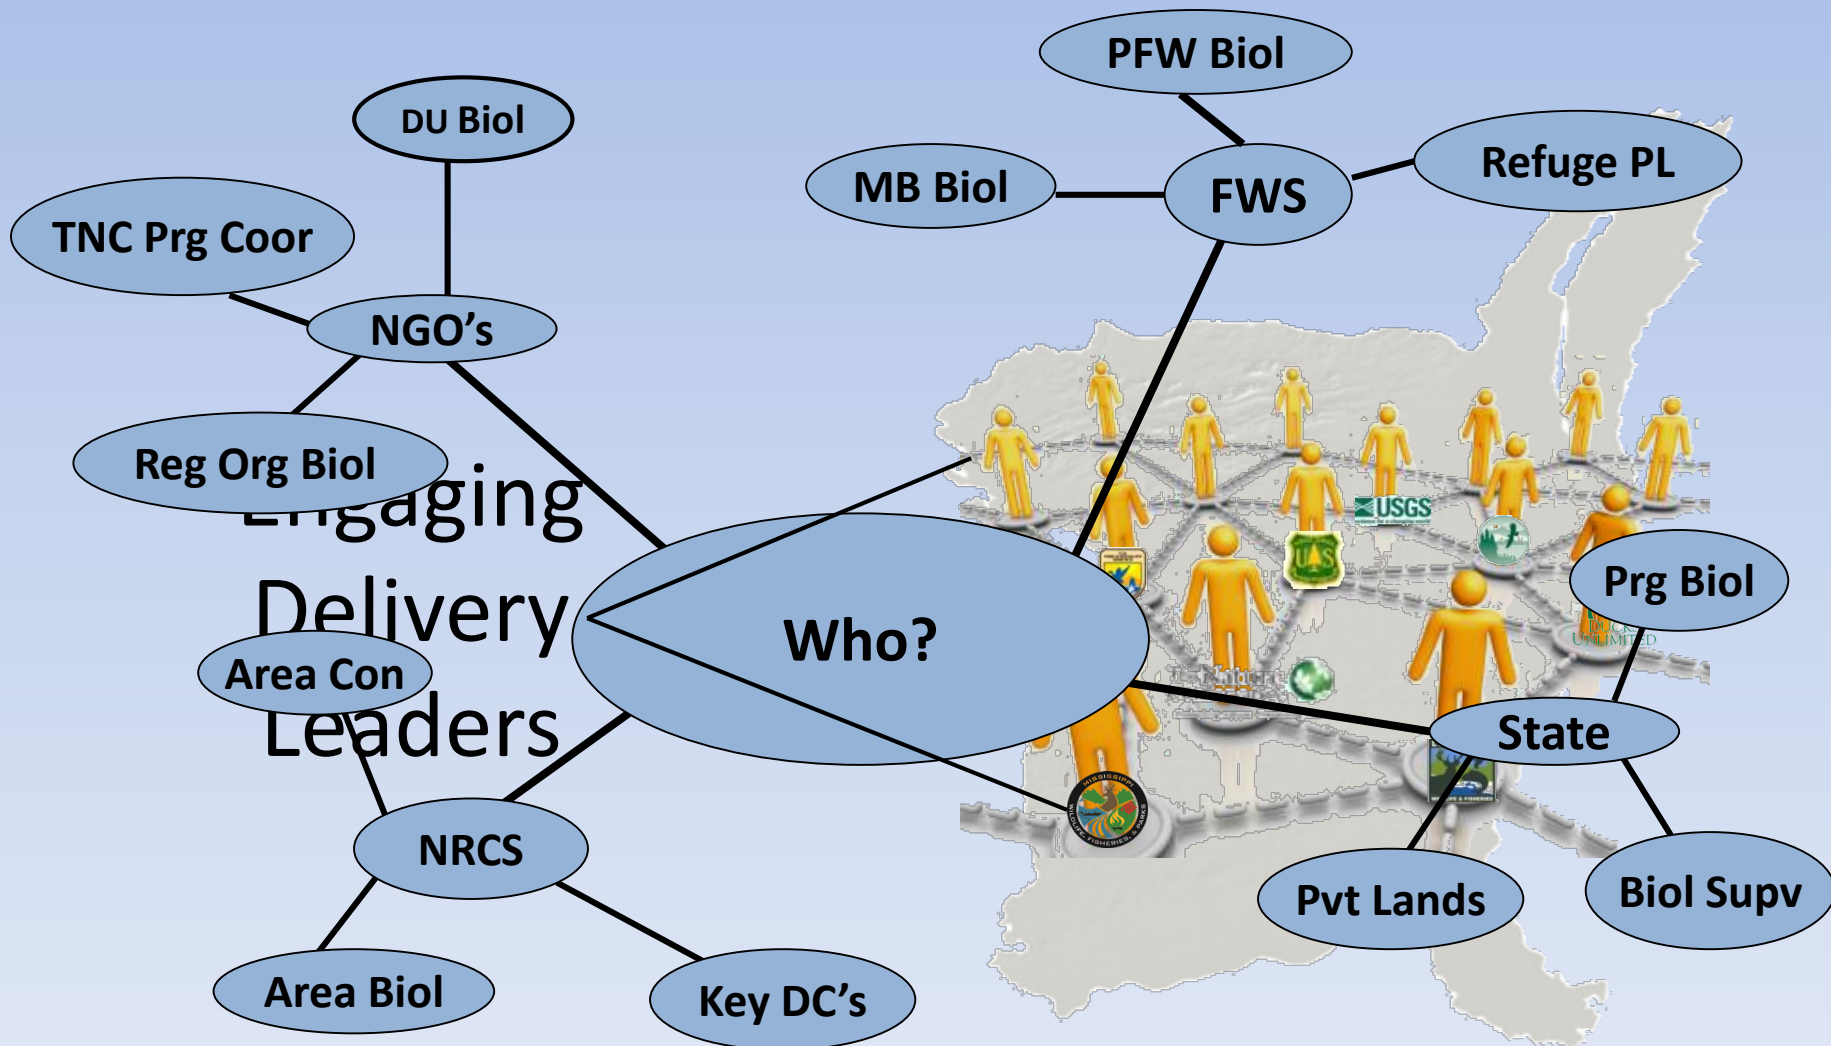

## Functionality:

- Large enough to be relevant
- Small enough to be logistically manageable
- Lead by SC
- Meet twice Annually
  - Networking
  - Information Exchange
  - Delivery Working Groups
  - Project Planning & Collaboration
  - Training & Workshops

# CDNs in Context:

## How Do We Make It Work?

### Strategic Habitat Conservation

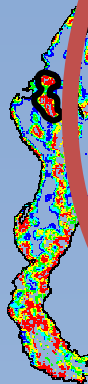

LMJV Forest Breeding Bird Reforestation Decision Support Model

# The Challenge of Connecting the People & People

## Planning

Table 4. Habitat objectives for select open space Conservation Markets, 2004.

| Species                | Population Objective | Mean Source | Hydro |
|------------------------|----------------------|-------------|-------|
| Blackburn's sparrow    | 62,883               | 97          |       |
| Brewer's-sided warbler | 49,666               | 56          |       |
| Ruf-sided woodpecker   | 49,676               | 174         |       |

# CDN: Form & Purpose

Conservation Delivery Networks - *Forums where agencies and organizations responsible for natural resource conservation coordinate on-the-ground delivery of otherwise independent efforts, prioritizing delivery actions that target development of sustainable landscapes.*

## Two Core Purposes :

1. Facilitate communication, coordination, and collaboration among delivery leaders – current JV and other partners
2. Facilitate communication between landscape conservation planning/design and on-the-ground delivery
